Resumo

I'm 20 years old and I'm a 3rd year student of Informatics and Computing Engineering Master at Faculty of Engineering, University of Porto (FEUP).

From where i can remember, I'm always passionate about technology special in the areas of security, web design and programming. These were the main reasons that made me choose Informatics Engineering to study and to work in the future.

Everyday i'm learning and evolving, like the world of technologic where everyday new things show up.
